

GORILLA NUTS™

CUSHION GRIP WIRE CONNECTORS

DID YOU KNOW THAT GORILLA NUTS:

Stop hand pain and injury?

According to the Bureau of Labor Statistics, the top cause of non-fatal injuries to Electricians are the parts and materials they use. Gorilla Nuts feature an over molded exterior which helps to prevent nerve damage in fingers and keep Electrical Contractors comfortable on the job!

Protect from over-stripped wires?

Part of the innovative Gorilla Nuts design is a flexible WorkSkirt™ which helps to cover up any over stripped wires.

Have bite?

That's right, Gorilla Nuts feature Sharp Wire Technology™. This means they have a square edge which really grips onto wires for a more secure connection every time.

Come in 1st Place?

According to United States Ergonomics, compared to other leading wire connectors, Gorilla Nuts were ranked #1 in the following categories: fit in fingers, finger tip comfort, grip shape, overall ease of use, and overall comfort.

Are the "talk of the town"?

Well, maybe not the entire town, but Electrical Contractors are sure raving about Gorilla Nuts! They are saying things like "they don't hurt your fingers," "very comfortable," and "my hands felt a great relief!"
