At CNS Frame Displays, we provide optical professionals with the essential components they need to create a unique, well-designed and attractive showroom at exceptional savings.

We strive to push the boundaries of optical retail innovation to provide a shopping experience for your customers that is efficient, enjoyable, and satisfying. Our goal is to meet and exceed the expectations of our clients by providing high quality optical related products. To do so, we continue to stay one step ahead of the trends in retail merchandising so that we can always offer our clients the leading solutions and exceptional products in combination with excellent customer service.

With the highly sophisticated clients we serve, we understand that the best solution for one retailer may not fit the needs of another. Therefore, our experienced staff of designers are available to address all of your individual needs, whether it is a set of custom acrylic rods for your cabinets or a newly-designed point-of-purchase display line for your upcoming eyewear collection.

Our product line includes an extensive assortment of optical frame displays, eyewear racks and storage cases, rotating displays and mirrors. All of our designs are the direct result of 20 years of

experience and ongoing market research to develop display solutions that meet the demanding needs of optical professionals. We are continuously developing new and innovative display solutions to assist our clients in presenting eyewear in a high-quality, fashionable way. Along with over 16,000 clients worldwide, we provide solutions to large, medium and small entities including; 3M, Aspen Eyewear, Aspex eyewear, Del Sol, Dept of VA affairs, Doctor's Vision Center, Duke University, University of Pittsburgh Medical Center, Performance Bike, Essilor USA, Eye Doctor's Optical Outlet, My Eye Dr, Eye mart Express, HMS Host, Lacoste USA, Macy's, Maui Jim Sunglasses, Modo, Premiere Vision, Sight for Sore Eyes, Starboard Cruise Services, Sterling Optical, Texas State Optical, The Limited, University of Georgia, University of Massachusetts, and many more.

In addition to our exceptional customer service, each one of our products is chosen based on the highest-quality standards of craftsmanship and design, which is why we are recognized by optical communities all over the world. At CNS Frame Displays, your satisfaction is always 100% guaranteed.

INDEX
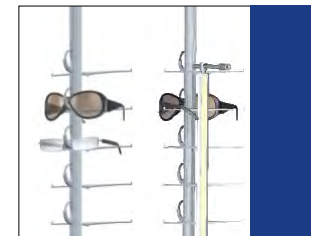

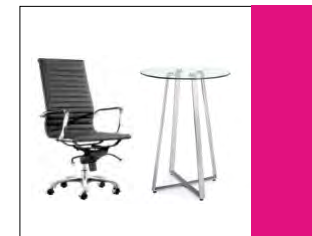

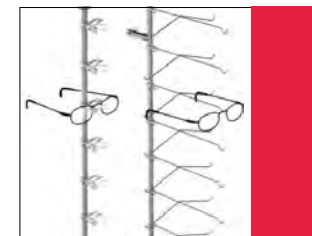

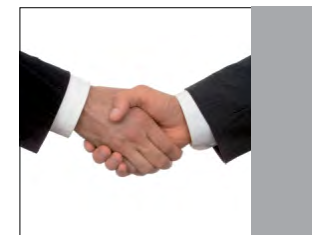

OPTICAL RODS

Our single rods allow you to utilize your wall area in an optimal way and increase the number of eyeglasses displayed. These rod displays are available in different capacities, up to 24 eyeglasses per single rod. You may choose between open, and mechanically or electronically lockable variants according to your needs.
We also provide coordinating accessories such as signboards, mirrors, and reduction clips to secure smaller frames in particular.

DISPLAY PANELS

Our optical display panels provide the building blocks for a perfect retail environment free of clutter and full of light. Multiple designs for you to choose from, in various finishes and sizes make it easy to outfit any area regardless of how large or small the space.

Our friendly, experienced staff is prepared to design your desired panel with your favorite colors, dimension, finish or background. The panels can be fitted according to your requirements with many hardware options. Due to a strong demand for our panel design concepts, we have developed a number of new panels unmatched anywhere in the world.

VARIO Panel System

The new VARIO LS-system provides the flexibility and creativity desired in the optical retail environment. Pre-drilled precision in-line holes function as receptacles for many components of this versatile display solution. The newest component member is the unique VARIO SIDE module, an eyewear holder which can be angled to 45°, showcasing the beautiful temples of today's hottest styles.

Swiveling eyewear display can be angled 45° to either side

LINEAR LED `NEW`

Our new LED shelves for LINEAR profile have a lot to offer: The shelves have elegant design and low installation height with visible light at the front edge. They also have a built-in LED light at the bottom which also illuminates underlying objects perfectly and brings to bear. But lighting is not the only function the filigreed shelves offer: In the shelves invisible magnets are embedded, which allows the flexible and orderly positioning of matching spectacle holders and thus provides a clear presentation.

SHINE

SHINE newly defines the displaying
of sun glasses in an optical shop.
Patterns are lasered on acrylic glass
and illuminated evenly through LED.
Since only engraved areas illuminate,
the illumination is only positioned
there, where it is wanted: behind the
sun glasses.

[Engraving & LED]
Latest laser technique combined
with LED illumination
[Space-saving]
Less construction depths as with
usual neon illumination
[Energy-efficiency]
Reduced power consumption at a
longer durability

SLIDE SYSTEM NEW

With our Slide System, your eyeglasses and accessories are displayed like gallery exhibits, and are protected against theft and dust at the same time. The key advantage to this presentation unit is that after unlocking the display, only one product container is released at a time, leaving the others secured.

each. Please order other accessories separately.

Kids Panels

Children love bright and bold colors, combined with simple shapes. By creating a visually inviting atmosphere for children and their families using our acrylic panels, printed with large lettering or shapes in vivid colors, you make trying on glasses a fun adventure. These panels, with a Frosted Ice background and themes for children, are available in our junior version with a height of 55".

Custom Panels

Are you looking for a unique wall display that nobody else has? We, at Frame Displays, are delighted to design individual motifs and print designs tailored to your shop and corporate vision, in order to create a personal atmosphere, where your customer feels absolutely comfortable. On these pages we present only a few examples of our wide range of designs — for further information and a personal consultation please do not hesitate to call us.

Your Logo

Graphic Motifs

Photos

Engraving

Your logo may be featured on one or several panels. Please provide us with a picture in print quality or a vector master in eps-format and we will do the work in promoting your corporate identity.

Panels can be printed uni- or multicolored by request. We will draft the design proposal with your desired specifications. According to the motif, foil lamination is also possible.

We put your photos directly on acrylic. You deliver the master in a print format, or we submit customized drafts — a truly personalized display solution.
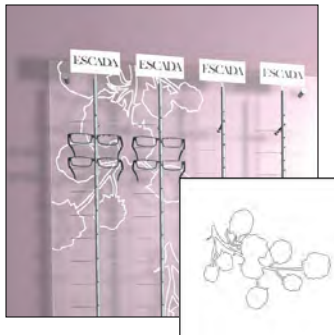

Enhance your acrylic panels with our new engraving technique. We only need your logo or favored motif as an eps-file with contours and we will engrave it directly on the panel.

SIDE PANELS
Acrylic side panels put a nice finishing touch on the side of the panels, preventing the back side of the panels to be exposed from the sides. The side panels are available in all acrylic panel finishes. Installation is a snap. Standoff hardware attaches directly to the original panel's standoff body. Two side panels are required per panel.

LED Light Box

Using the latest innovations in lighting and display technology, these extra thin LED light boxes offer maintenance-free illumination of your desired image or logo.

We have customized these two sizes, in 700 mm and 900 mm to match the width of all of our 700 and 900 mm wide panels. There are never any bulbs to change with these slim panels. These LED light boxes feature an edge lit lighting system that produces bright, even illumination in our thinnest profile ever.

Designed to be attractive, efficient, and user-friendly, an LED light box consumes less energy than traditional light panels, and last 15-20 times longer! Simple-to-use snap frames also make graphic changes a breeze. Our design department can work with you to produce and customize the artwork you need for these light boxes.

LED Light Box
Frame material and color: Anodized aluminum in brushed silver
27.5" wide version : (#LB-700) 456mm x 700 mm
35.5" wide version: (#LB-900) 456 mm x 900 mm
For custom printing choose (#LB-700-PRINT) for LB-700 Frames and (#LB-900-PRINT) for LB-900 frames.

WEBSITE LINK

LED EDGE Lighting

LED Edge Lighting Strips attach to the top and/or bottom edge of the display panels. For optimal results, use one LED on top and one at the bottom of the panel. Works best with Frosted White or Glass Look panels. A transformer is included with each LED strip.

SCOPE SYSTEM

The innovative SCOPE system offers maximum latitude for decorating your shop window or your promotion area. The system allows for assembly to the ceiling, to the floor, or placed in shop windows. The adaptor can be easily and safely bolted to a previous mounted rail system. Due to the wide range of mounting and practical elements of height adjustment of the individual telescopes, you can create new looks with this system.

ARRAY SYSTEM

The new flexible decoration system for your window can be attached directly or by using mounting rails. Individual components can be mounted onto it in any quantity and position. Countless formations result from easy re-arrangement of the decorative balls without a necessary change of the basic construction. Due to the intricate construction, the goods will be presented optimally to the fore.

Sphere LED **NEW**

SPHERE LED is a striking display design that artfully combines object lighting with merchandise presentation. Mounted between the ceiling and floor, this presentation system is perfectly suited for your shop window or as a room divider.

The LED lighting is located in the outer pivotal ring which emphasizes the brilliance of the merchandise in an energy efficient way. The inner circle is completely rotatable and can be equipped with shelf system, PUR2 system or MONO. The center of the panels are available in attractive colors, further enhancing the unique allure of the SPHERE LED.

VIDEO LINK

SK13 Basic element: Swiveling LED ring light made of polished aluminum with a rotatable intermediate panel made of acrylic, available in various colors, with 2 height adjustable pivots made of nickel-plated steel. Equipment can be selected individually. Please order separately.

LINK Countertop Eyewear Displays with Mirror   NEW

Ⓐ

Ⓑ

Ⓒ
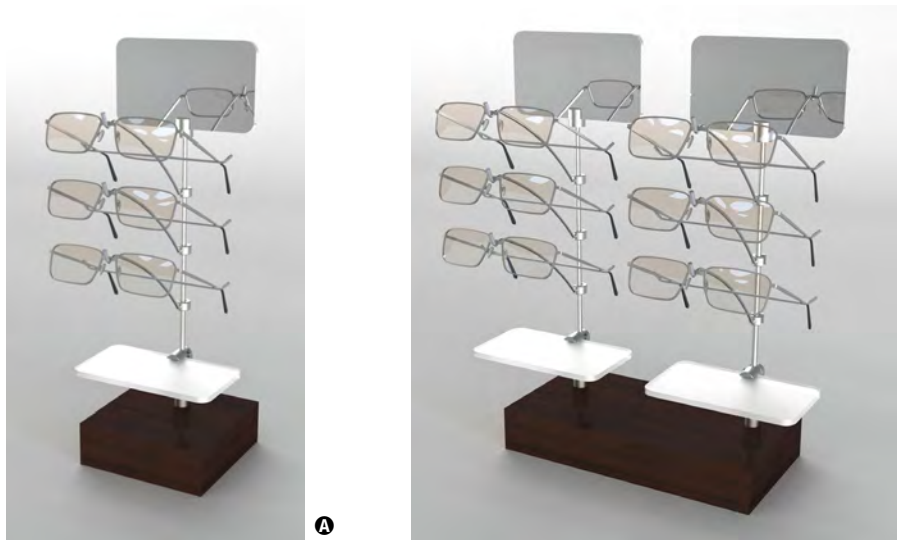

LINK Countertop Eyewear Displays with Mirror

Bringing a whole new "face" to the counter presentation of eyewear, our designers developed a new form for the modular table top displays. We refined the "single," the "double" and the "triple" towers with a wooden base, brushed metallic rod and chrome plated eyewear holders, as well as an acrylic mirror and an acrylic shelf per tower. The mirror can be substituted with a logo plate for P.O.P. displays.

Ⓐ Single Link Counter Display

Bases: 6" x 6" x 2"
Spacing between eyeglasses (vertical) = 2.5"
Overall height (all) = 18.5"
Maximum assembled overall widths: 7"
Mirrors and shelves = 7" wide x 5" tall
(#CL-1)

Ⓑ Double Link Counter Display

Bases: Two of 6 " x 6" x 2"
Spacing between eyeglasses (vertical) = 2.5"
Overall height (all) = 18.5"
Maximum assembled overall widths: 16"
Mirrors and shelves = 7" wide x 5" tall
(#CL-2)

Ⓒ Triple Link Counter Display

Bases: Three of 6 " x 6" x 2"
Spacing between eyeglasses (vertical) = 2.5"
Overall height (all) = 18.5"
Maximum assembled overall widths: 22"
Mirrors and shelves = 7" wide x 5" tall
(#CL-3)

OPTIQUATTRO SYSTEM

The new Optiquattro™ system sets the new benchmark for eyewear display design, ease of installation, and affordable price. It is unique due to a thin square rod design (less than 6mm) which provides a perfectly straight and level system with no adjustments needed post installation. This display system includes a range of frame holders made from high-quality clear polycarbonate and stainless steel, including vertical and horizontal attachments, as well as a magnetic variant, and an adjustable nose clip.

The smart mounting options and fixtures make installation seem like child's play. Wall or cabinet attachments, recessed mounts for acrylic panels and frame boards are included.

OPTIQUATTRO RODS, ACRYLIC RODS, AND OTHER PARTS

Our Optiquattro single rods are designed to optimize your wall space and increase the number of eyeglasses you would like to display. The rods are available in several capacities for up to 24 eyeglasses per single rod. Optiquattro rods meet your demands, allowing you to choose between the open alternative, or a mechanically or electronically lockable one. Of course, we also provide a selection of accessories to enhance your display, such as signboards and mirrors, as well as the hardware needed to secure smaller frames, such as reduction clips.

NEW

I DW.100
Our single eyewear frame display system allows for flexible space planning and a wide range of choices for personalized arrangements. This nickel-plated unit can attach to most wall surfaces, as well as cabinet walls, and acrylic or plexi-glass plates. DW.100 consists of two easy to install components: the plastic base, which is screwed on to the desired surface, and the metallic cross-shaped frame holder, which can be snapped on to the base.

8" (L) x 7" (W)

J DW.101
Our aluminum single eyewear display system attaches to most surfaces including drywall, wood and acrylic or plexi-glass plates. DW.101 consists of two components: the metallic screw base which secures on to the desired surface, and the metallic cross-shaped frame holder, which is attached to the base screw.

$7^1/8$" (L) x 6" (W)

K DW.102
This single eyewear frame display system allows for a one-point installation, and a wide range of options for personalized arrangements, including wall or cabinet mounting applications. Sold in packs of 12 only.

$6^1/4$" (L) x $6^1/2$" (H)

L Wall mount metallic rod system
The entire metallic rod system can be used for wall mount and cabinet mount optical displays. Our universal rod thread allows you to easily expand your displays by adding rods and holders quickly and easily. Combine our Eye-Frame Holder (20.1073) and different metallic rod options (available 12", 24", 36", 48" and 60" lengths). The rods are made of stainless steel. Various logo and shelf holders are available to combine with the rods.

Versatility, simplicity and elegance are the driving influences behind the stand off and hardware systems in this page. Our system stands apart from the rest with a uniform thread size and completely modular design. Our components are designed to interact with one-another creating an infinite number of combinations. Don't see the kit you are looking for? You can create your own. Through our universal thread size, we eliminate the need for multiple tools when assembling our kits. This feature creates a merchandising and signage system that evolves with your needs. The flexibility of our system can solve any design challenge while providing a functional and simple solution. Whether our customers are involved in retail display, graphics, signage, way-finding, furniture design, or store-fixtures, they can find comprehensive solutions to their hardware needs in our selection of parts and kits. Contact us and let us design your desired display or signage with more than 100 in-stock components.

MONO Locking Pin

This wall mounted panel has locking metal supports for the frame bridge and holes to support the frame temples. It comes in four finishes and six sizes that hold between 12 and 112 frames. Frames can be locked individually and released quickly with a push key.

MONO Wall   NEW

The lockable MONO WALL system allows you to secure and unlock single eyeglasses separately, which is particularly suitable for displaying high-quality frames. MONO WALL can be mounted directly on brickwork as well as on perforated panels. The design is simple but elegant, with a perfect combination of silver-colored anodized aluminum and high-quality plastics. With the use of the reduction clip, frames in every model and every size can be presented fashionably.

COMPLIMENTARY DISPENSARY/ OFFICE DESIGN

We proudly provide completely complimentary "Basic" design assistance for your optical dispensary or office using the latest software technology. Our professional designers prepare a complete floor plan based the information you provide. Classic and Premium design options are also available at a minimal charge.

Once our staff has all the facts they need, they develop a detailed diagram representing your optical dispensing and consultation office, including placement of examples of the latest cutting-edge furniture and displays. They even take into account your patient flow management to assure that your office is both functional and stylish.

The last, exciting steps in the designing process bring your customized space to life by adding your specific wall colors, lighting, and decor. With our amazing software, our designers will show you the final representation of your completed optical office space.

WEBSITE LINK

HOW IT WORKS:

1
Download the design questionnaire:
http://site.framedisplays.com/ Design_Quest.pdf
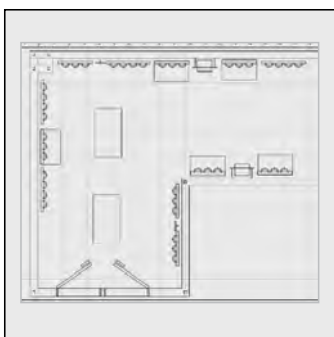

2
Complete the questionnaire, then fax it to **(703) 435-3180**, along with a floor plan or itemized drawing of your space with exact measurements. Please note that all design projects are completely complimentary, provided the merchandise used in the design is purchased from CNS Frame Displays.
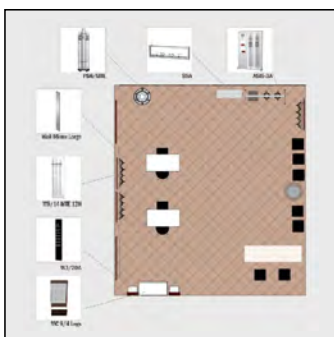

3
Our professional designers prepare a complete floor plan based on your provided information.

4
Our designers then email you the final 3D rendering of your optical shop, along with a quote for the project.

BASIC

The BASIC system is a level of design that is suitable for small modifications within your shop or office. It provides a functional and practical solution when you need to improve the current presentation of your merchandise. The advantage of starting with the BASIC is that you can add more modules at a later date as you need them.

CLASSIC

Ask for the CLASSIC system if you need to reconstruct a complete shop. We provide a wide range of different materials, colors, and designs to customize your optical space, and present it with a new and modern look. With the CLASSIC system, you receive a professional and economical design solution.

PREMIUM

The PREMIUM design system is the best solution for those optical professionals who are looking for a truly individualized shop or office space. Select from the highest-quality fixtures and design elements to create an environment that is exclusively yours.

CNS Frame Displays has over 40 years of combined experience in optical and commercial interior design. Our list of over 16,000 clients worldwide includes companies of all sizes, in a wide variety of commercial fields. A small sampling of our clients:

Design service
We proudly provide complementary optical dispensary design services using the latest software technology from Germany. Our professional designers prepare a complete floor plan based the information you provide. Once our staff has all the facts they need, they develop a detailed diagram representing your optical dispensing and consultation office, including placement of examples of the latest cutting-edge furniture and displays. They even take into account your patient flow management to assure that your office is both functional and stylish. The last, exciting steps in the designing process bring your customized space to life by adding your specific wall colors, lighting, and decor. With our amazing software, our designers will show you the final representation of your completed optical office space.
Please see some of the final 3D computer drawings by visiting our website www.framedisplays.com.

To begin the process, please download and complete the questionnaire from our website, then fax it to 703-435-3180 along with a blue-print or itemized drawing of the space. Please note all design projects are complimentary as long as the merchandise used in the design plan is purchased from framedisplays.com. Otherwise there may be a service charge.

Shipping & freight charges
Up-to-date UPS shipping charges can be accessed online at www.framedisplays.com. Items such as large acrylic panels, large eyewear displays and furniture pieces that can not ship with UPS will be shipped with a freight company. Please be advised that additional charges may apply for all freight shipments. All freight pieces will be shipped ready–to-assemble.

Damages/loss
When a shipping company accepts a shipment from CNS Frame Displays, they are acknowledging that shipment is not damaged and it was packaged appropriately. At the time you receive your shipment, any damage or loss of items is the responsibility of the individual shipping company. Please be aware of the following upon receipt of your shipment:

Examine your order when it arrives. You have 10 days to report damage to the products.
If you notice damage immediately on the outside of the box or if you find damage after opening the shipment, notify CNS Frame Displays immediately at:
877-274-9300 or 703-435-7770.
We can often be of assistance in tracking portions of and/or missing shipments.
NO returns will be accepted, credit given or damaged items replaced, unless CNS Frame Displays has been notified.
If not instructed to do so by the shipping company or CNS Frame Displays, please do not discard any shipping materials as they may be needed to return products or the shipment may need to be inspected with all materials intact.

For returns/exchanges:
Your satisfaction is very important to us. If you are not completely satisfied with an item:
Please return the merchandise in its original condition within 30 days (from date goods are received).
Please call for your RMA number. We will not accept any goods without this number.
We cannot provide refunds for scratched or abused displays.
Shipping and handling fees are non-refundable.
A 20% restocking fee will be deducted from your refund for all returns.
All shipping costs for returns are your responsibility.
Customized items are not eligible for return, but may be eligible for exchange if you receive prior approval.

Cleaning your displays
Alcohol, acetone and other chemically based cleaning products will damage acrylic and other display products. Please use water or mineral spirits ONLY. Dusting without chemicals is often sufficient.

Payment and Tax Information Terms & Conditions
We accept Checks and all major credit cards including Visa, MasterCard, Discover and American Express. All orders are to be prepaid unless an account has been established with us before your order is placed. All custom and special orders require a 50% deposit. Virginia State Sales Tax is applied to customers from Virginia. Other applicable local, state or federal taxes for our out-of-state clients are their sole responsibility.
