

How to customize Your Logo on matrix switcher

Step 1: Get the upgrade firmware ready

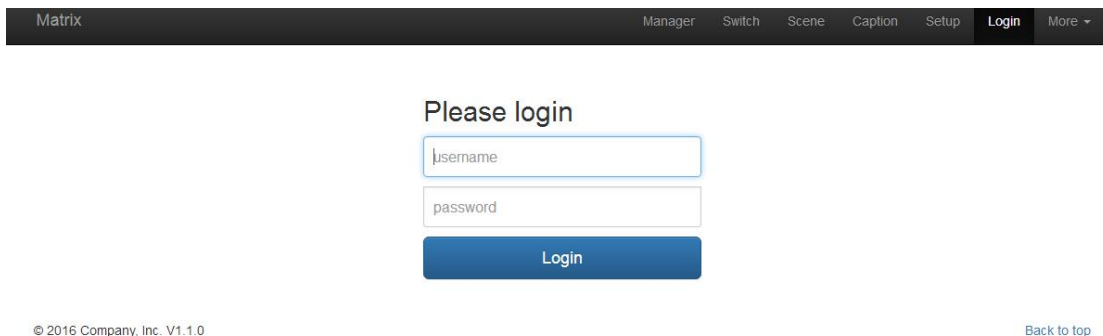

Step 2: In the firmware, will need to have 3 pictures “**banner**” “**logo**” and “**startup**” with the wanted contents/logo on, please make sure don’t change the picture names, and the format is **.png**.

Step 3: Have this firmware compressed to the .zip file. Then the firmware is ready to go.

Step 4: Make sure the matrix switcher is connected with the control PC by LAN, and log in with the browser.

Step 5: After login, go to the “More” interface and will see the “Upgrade” button

Step 6: Click the “upgrade” button, will show the window to upgrade

Step 7: After choosing the right firmware and click to upgrade, then matrix switcher will reboot itself, just wait for 30 seconds, your customized logo/startup screen is all set.
