## A4910 Lubri - Economize the lubrication process

The A4910 Lubri is a maintenance tool used for monitoring and control of the lubrication process. The A4910 Lubri measures the actual bearing lubrication status and informs the operator when the lubrication state is optimal. The A4910 Lubri helps to ensure that bearings will not be under or over lubricated.

Application of the A4910 Lubri extends the bearings life and saves lubricants. Headphones can be connected to listen to the bearing condition. The A4910 Lubri is simple to operate and also enables you to perform basic measurements and diagnosis of bearing condition.

Values in traffic light colours tells you when to add the grease

Lubrication OK

Add grease

Dry bearing

- Heavy-Duty aluminium case
- 2AA rechargeable or AA alkaline
- 8 hours operation

Easy to use:

- One button operation
- No instrument set up
- Colour graphic display
