

LX1 USB AgrowLINK™ connects Agrowtek's GrowNET™ sensors, relays or dosing pumps directly to a computer. Free PC software displays real-time sensor readings, downloads and configures data logging history from the sensor, allows on-board calibration, basic email alerts, recipe batch dosing and more!

Connects to any Agrowtek device with a GrowNET™ port. Use the simple update software to upgrade device firmware in seconds when new features are added! Add multiple GrowNET™ devices using HX8 multi-port GrowNET™ hubs.

Communicate directly to GrowNET™ intelligent devices using MODBUS RTU or the expanded GrowNET™ command set.
