

GrowControl™ SXE Environmental Monitor, Logger & Controller is a precision digital indoor climate sensor with 3-button LCD display featuring temperature, relative humidity, ambient light and optionally CO2 ppm sensors.

Internal memory logs over 20,000 data points per sensor. Connects to Agrowtek's GrowControl™ Cultivation Controllers as part of a complete facility control solution. Available with WiFi module for stand-alone or remote monitoring, data logging, alerts, and more.

LX1 USB AgrowLink connects the GrowNET™ port to a PC with free PC software for datalog download, graphing, calibration, configuration, firmware updates, etc. LX2 ModLINK connects GrowNET™ devices to RS-422/485 for MODBUS RTU protocol communication.

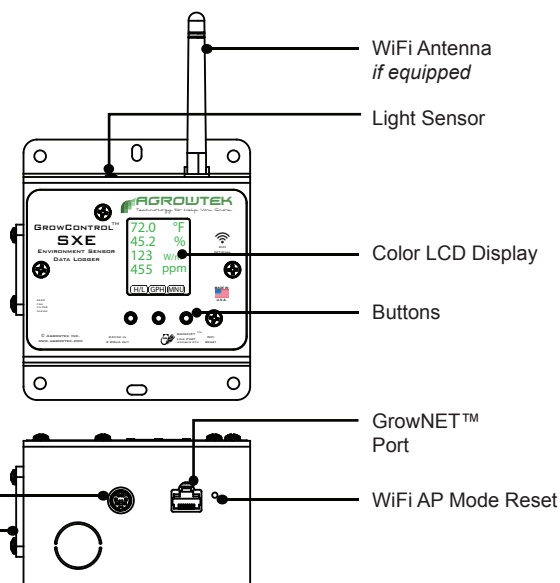

Sensors

-  Air Temperature
-20 - 60°C
-  Relative Humidity
0-99% RH
-  Light (Irradiance)
0-1000 Watts/m2
-  Carbon Dioxide (optional)
0-10,000 ppm
-  Real Time Clock (RTC)
Battery Backup Included
-  Fan aspirated with
air filter for high accuracy

Features

-  WiFi optional for direct sensor monitoring
and web portal connection
-  GrowNET™ Digital Communication Port
-  MODBUS RTU via LX2 ModLINK
Optional 4-channel 4-20mA analog outputs
-  Durable powder-coated steel enclosure
-  1-Year Warranty
-  Made in USA

Compatible

Typical Applications

Greenhouses & Indoor
Growing Facilities

Industrial Process Monitoring
Data Centers, Server Rooms

Home Environment Monitoring

Agricultural Facilities

Analytical, Data Logging
research & academic applications

OEM & custom applicatoins

Stand Alone

WiFi

LX1
USB/PC

LX2
MODBUS

XXX
RS-422
RS-485

Optional WiFi allows monitoring directly from a web browser, email alerts and more. Sensors can be connected to the LX1 USB Link with free PC software for data logging. Connect to industrial controllers using LX2 or LX4 ModLINK interface for standard MODBUS protocol. HX8 GrowNET hubs allow multiple devices to be addressed on an LX interface.

MCX Climate Controller

Combine a sensor and a RX4i or RD8i relay to form a powerful and economical basic control system. Configure standard control functions on the sensor to operate a relay module without a controller. Log data to the sensor's internal memory or add the WiFi module for browser access or web portal logging, email alerts, and more.

Master Controller

Connect to GrowControl Cultivation Controllers for advanced functions as part of a complete facility control solution. GrowControl systems are loaded with intelligent control functions optimized for today's complex growing environments.
