The Best Ergonomics and an Economical New Thermal Resolution for Intensive Inspections

Inspect high and low comfortably all day and capture stunning shots effortlessly with the latest addition to thermal imaging's most flexible line of handheld cameras.

**A New High IR Resolution –** Crisp thermal images with 172,800 pixels  $(480 \times 360)$  for the better detection, picture quality, and temperature measurements from long range.

**Exclusive Rotating Optical Block –** Work smarter. Scan targets overhead, and from other tough angles effortlessly with the lens system that lets you point 120° up or down while keeping the display in easy view.

MSX® Enhancement - Multi-Spectral Dynamic Imaging adds visible spectrum definition to IR images in real time for excellent thermal detail to help you instantly recognize the problem locations.

Remote Control and Streaming Video via Wi-Fi – Control camera functions, stream video for live monitoring, and import images and data from the camera using the FLIR Tools Mobile app on your smartphone or tablets so you can share critical information quickly from the field.

**Auto-Focus Precision –** FLIR T-Series cameras offer both manual control and the fastest auto-focus in the industry to snap in ultimate clarity and accuracy.

Accuracy - Calibrated within +/- 2°C or +/- 2% of reading.

Multiple Measurements - Report all the details with 10 measurement spots, 5 box areas, Delta T temperature differential, isotherm, and auto hot/cold markers.

**METERLINK®** – Wirelessly transmit vital diagnostic data from clamp and moisture meters directly to the camera for annotating thermal images to further support findings.
