Rugged and Wireless

The SRS3 Wireless Refrigerant Scale combines modern wireless electronics and rugged materials to perform at the high level you demand. The platform is made of thick aluminum to maintain accuracy over the life of the product. Rubber bumpers and pad cushion both the tank and the scale itself. A new wireless protocol sends platform measurements to both the included remote display and the Fieldpiece Job Link™ mobile app. Platform electronics are sealed to block the occasional moisture seen from rain and splashing. Hang the remote display from a condenser or anywhere metallic and easy to see. The magnetic folding hat holds it right where you put it.
