100% bamboo
seamless blue
machine knit shell
with black foam
latex palm coating.

GP199
Size 7-11

Bamboo: an innovative approach to comfort

Magid Glove & Safety's Bamboo ROC™ Gloves offer naturally-enhanced comfort thanks to their 100% bamboo fabric shell. Bamboo fabric breathes easier, weighs less, and wicks moisture away from the skin faster than cotton or synthetic materials. Possessing antibacterial and antifungal properties, bamboo reduces bad odors and irritants, extending the life of the glove.

Is your company going green?

Bamboo ROC™ Gloves, made from one of nature's most sustainable resources, is the ideal choice in hand protection for the environmentally-conscious company. From manufacture to disposal, bamboo reduces the impact to the environment every step of the way.

Uncompromised performance

Bamboo ROC™ Gloves offer superior comfort while providing the toughness and grip that you expect from ROC™. The gloves' black foam nitrile or foam natural rubber latex palm delivers excellent grip, dexterity, and abrasion resistance while hiding dirt and grime.

A general assembly glove you can feel good about.

● Environmentally friendly construction

Bamboo fabric is made from one of nature's most renewable resources and offers minimal environmental impact compared to other materials.*

● Breathable and cool

Softer and lighter than cotton, the gloves' bamboo shell offers superior comfort, keeping hands as much as two to three degrees cooler than cotton or polyester.

● ROC-tough

Magid's premium palm coatings give these gloves increased abrasion resistance and ANSI Cut Level 1 protection.

● Wicks away moisture

Bamboo's unique porous structure kicks moisture to the curb, offering up to four times more absorption than cotton.

● Antibacterial and antifungal

Bamboo fiber contains a natural agent that inhibits the growth of bacteria and fungus, eliminating odor and extending the life of the glove.

● Super-strong grip

Available with foam nitrile or foam natural rubber latex palm coating, Bamboo ROC™ Gloves give you a firm, flexible grip ideal for general assembly and material handling.

● Natural UV protection

Bamboo ROC™ Gloves offer natural UV protection that makes working outdoors worry free.

*The bamboo pulp fiber used in the manufacture of Bamboo ROC™ Gloves is made using a mechanical process without the use of environmentally harmful chemicals.
