ANSI CUT LEVEL 1

PF540
Size 6-10

Cutting edge performance

Magid® D-ROC™ Work Gloves are manufactured from a Dyneema® brand high performance polyethylene (HPPE) fiber and synthetic yarn blend that delivers an exceptional combination of comfort, cut protection and abrasion resistance when compared to gloves made from other fibers. In addition, the premium polyurethane palm coating delivers additional abrasion resistance and makes D-ROC Gloves the ideal solution for industrial applications where excellent durability and wear are required.

Superior dexterity and grip

Flexible and form-fitting, D-ROC Work Gloves utilize the same coated machine knit construction as their revered ROC family counterparts to provide unsurpassed fit and dexterity. And thanks to the polyurethane palm coating, oils and lubricants are channeled away, ensuring a superb grip in both dry and wet conditions.

All-day comfort

Magid D-ROC Work Gloves are soft, breathable and cool to the touch keeping hands comfortable no matter how long the shift. Moreover, all D-ROC Glove styles hold up well to laundering and feature color-coded overcasts for efficient sorting and distribution.

Tough protection with uncompromised comfort!

- Dyneema® brand high performance polyethylene (HPPE) fiber blended machine knit shells offer superior cut and abrasion protection in a comfortable, lightweight construction.
- Seamless machine knit stretches and conforms to the hand for an exceptional fit.
- Flexible, form-fitting polyurethane coating is durable and abrasion resistant while providing outstanding dry and wet grip.*
- Knit wrist with color-coded, rubber band finished cuff prevents unraveling and allows for easy identification and sorting by size.
- Sturdy blended knit maintains its strength and durability wash after wash.
- Low-lint properties on all styles with silicone-free construction on select styles (GPD546) serve to reduce concerns over product contamination.
- For use in appliance manufacturing, automotive, assembly, metal stamping and metal fabrication applications.
