Pressure meters for gas and water fitters

testo 312-2

testo 312-2, fine pressure measuring instrument up to 40/200 hPa, DVGW approval, incl. alarm display, battery and calibration protocol

Part no. 0632 0313

Use the testo 312-2 fine pressure measuring instrument to check flue gas draught, differential pressure in the combustion chamber compared with ambient pressure or gas flow pressure with high resolution. Fine pressures with a resolution of 0.01 hPa can be measured in the range from 0 to 40 hPa.

DVGW approval according to TRGI for pressure settings and pressure tests on a gas boiler.

- Switchable precision range with a high resolution
- Compensation of measurement fluctuations caused by temperature
- Alarm display when user-defined limit values are exceeded
- Clear display with time

testo 312-3

testo 312-3 versatile pressure meter up to 300/600 hPa, DVGW approval, incl. alarm display, battery and calibration protocol

Part no. 0632 0314

The versatile pressure measuring instrument testo 312-3 supports load and gas-rightness tests on gas and water pipelines up to 6000 hPa (6 bar) quickly and reliably. Everything you need to inspect gas and water pipe installations: with the electronic pressure measuring instrument testo 312-3, pressure- and gas-tightness can be tested. Via pressure drop, you can quickly determine the amount of gas leaking and the serviceability of the gas pipelines. A gas leak is quickly detected by testo 316-1.

- Load and gas-tightness test on gas pipes
- Pressure test on water pipes
- Fast measurement of gas leak quantity
- Switchable precision range with a high resolution
- Compensation of measurement fluctuations caused by temperature
- Alarm display when user-defined limit values are exceeded
- Clear display with time

The complete maintenance set with documentation

- Pressure measuring instrument up to 40/200 hPa (Part no. 0632 0313)
- testo 312 / testo 315 TopSafe; protection case with bench stand; protects instrument from dirt and impact (Part no. 0516 0443)
- Pressure set (Part no. 0554 3150)
- Pressure set (Part no. 0632 0316)
- testo 316-1 TopSafe; protection case, incl. stand, protects from dirt and impact (Part no. 0516 0189)
- Testo report printer (Part no. 0554 0549)
- Transport case; plastic; (Part no. 0516 3120)

Fulfilling all measurement tasks on gas heating systems and on gas and water pipes.

With the electronic differential pressure gauge testo 312-4, fine pressure measurements can be carried out quickly and reliably when checking the resting pressure and flow pressure of gas, and when setting the correct jet pressure on gas burners and boilers.

Tests on newly installed gas pipes (load and gas-tightness tests), or on pipes already in use (serviceability tests) can also be carried out quickly and in accordance with the law. The user-friendly menu structure for the respective measurements considerably eases work.

Time and money can be saved in customer service, especially when checking the gas pressure regulator, thanks to the automatic measurement value recording over several hours by testo 312-4 (max. 25,000 measurement values). The use of special C-Flex hoses guarantees the gas-tightness of the hoses, particularly in long-term measurements. The simultaneous recording of pressure and temperature allows the detection of unusual pressure fluctuations which are graphically analyzed by the Easyheat PC software, and can thus be easily explained to the customer.

Load tests and leakproofness tests on drinking water and waste water pipes can be carried out without complications using the handy high-pressure probe. The external probe provides excellent protection for the instrument from water and high pressures.

- Gas-tightness and serviceability test by pressure drop on gas pipes according to DVGW-TRGI 2008
- Load test on gas pipes according to DVGW-TRGI 2008 with the help of the high pressure probe
- Checking the regulator by recording the measurement values over a defined period
- Checking the gas connection pressure and gas flow pressure as well as setting the jet pressure on gas burners and boilers
- Pressure tests on drinking water pipes with water using the high-pressure probe according to DIN 1988 (TRWI) as well as with air according to the ZVSHK information sheet
- Pressure test on waste water pipes according to DIN EN 1610 using the high pressure probe
