5. FIREFIGHTING MEASURES

Suitable Extinguishing Media Large volumes of water. Chemical fire extinguisher. Sand.

Specific Hazards From Combustion Refer to supplier's Safety Data Sheets for specific information on component.

Personal Protection Use air-ventilated full mask and full protective clothing.

6. ACCIDENTAL RELEASE MEASURES

Hazardous materials are contained in sealed units within the life vest. Spills should pose no threat if sealed units are not breached. If compressed gas cylinder may discharge or rupture, ventilate the area. Refer to supplier’s Safety Data Sheets for specific information on component.

7. HANDLING AND STORAGE

Handle the life vest with care. These units should be stored in a cool and dry area away from danger of sparks, heat or flame. Do not pull the inflation tab on the vest. Opening the package and unpacking the vest may cause it to inflate. Life vest can cause injury if inflated close to people or in a confined area. Prolonged exposure to moisture may cause water activated lights on some vests to discharge and give off a non-hazardous “rotten egg” smell. Fully ventilate the area. On vest models equipped with water activated inflation systems, prolonged exposure to moisture can cause the vest to inflate by itself. Refer to supplier’s Safety Data Sheets for specific information on component.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

N/A. Refer to supplier’s Safety Data Sheets for specific information on component.

9. PHYSICAL AND CHEMICAL PROPERTIES

Refer to supplier’s Safety Data Sheets for specific information on component.

10. STABILITY AND REACTIVITY

The life vest is stable if stored in the original package in cool and dry conditions. Do not subject life vest to high temperatures or excessively humid conditions. Refer to supplier’s Safety Data Sheets for specific information on component.

11. TOXICOLOGICAL INFORMATION
