

HD36

36" Downdraft Vent Hood

DCS downdraft systems, effectively extract grease, steam and odors keeping your kitchen fresh and clean. The downdraft systems feature variable speed controls, brushed stainless steel finish and a retractable design that fits seamlessly into your kitchen bench. Downdraft vent hoods must be paired with a DCS internal or external blower (HBD600I or HBD1200E) depending on your requirements.

Features & Benefits

Performance

DCS downdraft systems are available in two convenient sizes. They powerfully and effectively extract unwanted grease, smoke and odors through stainless steel mesh filters with fan speeds up to 1200 CFM that operate quietly and efficiently. The 14" lift maximizes extraction while smoothly retracting for a discreet appearance when not in use.

Discreet Design

This powerful downdraft system slides away discreetly into the countertop when not in use. Downdraft ventilation systems are perfect for those who do not want an overhead ventilation hood.

Simplicity and Control

DCS downdraft systems are designed for simplicity of use with a single on/off button and slider for precise control over fan speed.

Easy to Clean

The high quality stainless steel mesh filters are easy to remove and dishwasher safe.

Specifications

Cleaning

DW safe stainless steel mesh filters

Measurements

Maximum Duct Length	40"
Required duct size (diameter)	6 "

Performance

CFM Rating	As per blower
Infinite speed control	•

Power requirements
